RAHUL SINGH

AI Workflow & Automation Associate | Data Analyst

rahulsingh52203@gmail.com • 9115481930 • Chandigarh • linkedin.com/in/rahul-singh-analyst • github.com/RahulAnalyzer

PROFESSIONAL SUMMARY

BCA graduate (MCA pursuing) with hands-on experience in Python, SQL, ETL pipelines, and AI tool integration. Builds automated workflows using ChatGPT, Claude, and LLM-based platforms. Certified in AI Fluency (Anthropic). Focused on turning data into decisions and reducing manual effort through automation.

WORK EXPERIENCE

Software Development Intern | **BridgeLabz Solutions** | *Dec 2025 – Present*

- Contributed to The Practice App — an AI-powered learning and assessment platform featuring coding assessments, automated evaluation, adaptive feedback, progress tracking, leaderboards, and mentor monitoring dashboards; supported backend assessment workflows designed to personalise learning paths based on individual user performance data and progress analytics.
- Participated in regular code reviews and structured progress assessments; submitted weekly deliverables against a defined learning roadmap set by senior technical mentors.

AI Workflow & Data Analyst Intern | **Novem Control** | *Dec 2024 – Jun 2025*

- Automated data processing workflows using Python & SQL, reducing manual effort by 15% across a team of 3 analysts.
- Analyzed 100,000+ records with Pandas & NumPy to identify patterns in operational data, contributing to a 10% improvement in process efficiency.
- Built regression models achieving 85% accuracy; developed Tableau dashboards for daily operational reporting used by the internal team.
- Tested and evaluated LLM platforms including ChatGPT and Claude for business reporting use cases; refined prompts to improve output accuracy and relevance.

PROJECTS

AI Data Analyst Dashboard | *Python · Pandas · Streamlit · Groq LLaMA 3.3 70B · Plotly*

Live: ai-business-analysis.streamlit.app | GitHub: github.com/RahulAnalyzer/ai-business-analyst-dashboard

- Built an AI-powered analytics dashboard that converts any CSV into KPIs, trend charts, and executive summaries using Groq LLaMA 3.3 70B — reducing manual reporting time by ~80%.
- Automated data quality checks using IQR-based outlier detection and missing value heatmaps; used LLM-generated suggestions to guide data cleaning across uploaded datasets.
- Developed a natural language Q&A interface mapping plain-English questions to dynamic Pandas aggregations; deployed on Streamlit Cloud with GitHub CI/CD and API key security via environment variables.

Data Warehouse & Analytics Pipeline | *SQL | ETL | Medallion Architecture*

- Designed a data warehouse using Bronze/Silver/Gold Medallion Architecture on SQL Server, integrating ERP and CRM data through automated ETL pipelines.
- Built a SQL analytics layer that tracked customer behaviour, product performance, and sales trends; documented the full architecture using Draw.io.

Healthcare & Drug Analytics | *Python | ML | Tableau*

- Predicted patient readmission within 30 days at 85% accuracy using Python ML models; reduced false positives by 15% via feature engineering.
- Built Tableau dashboards used by 1,000+ users; analysis flagged inefficiencies in treatment protocols estimated to reduce costs by $50,000 annually.

SKILLS

AI & Automation: ChatGPT, Claude, Groq LLaMA, LLM Platforms, Prompt Engineering, Workflow Automation (n8n / Zapier / Make)

Programming & Data: Python (Pandas, NumPy, Plotly), SQL, Streamlit, Excel, Google Sheets, ETL Pipelines, Data Warehousing, Star Schema

Visualization & BI: Tableau, Power BI, Plotly, Streamlit

APIs & DevOps: REST APIs, Groq API, HubSpot (CRM), GitHub CI/CD

EDUCATION

MCA – Computer Science | Chitkara University | 2025 – Present

BCA – Computer Science | Chitkara University | Graduated Jun 2025

CERTIFICATIONS

- AI Fluency Framework & Foundations – Anthropic (Mar 2026)
- Introduction to Data Science – Cisco (Nov 2025)
- Data Analytics Professional – Deloitte (Mar 2025)
